

Power BI Assignment – 1

- Install Power BI Desktop and share the final screenshot of the report view page which appears when power desktop starts.

• Prepare a document and with the following screenshot

– Report View

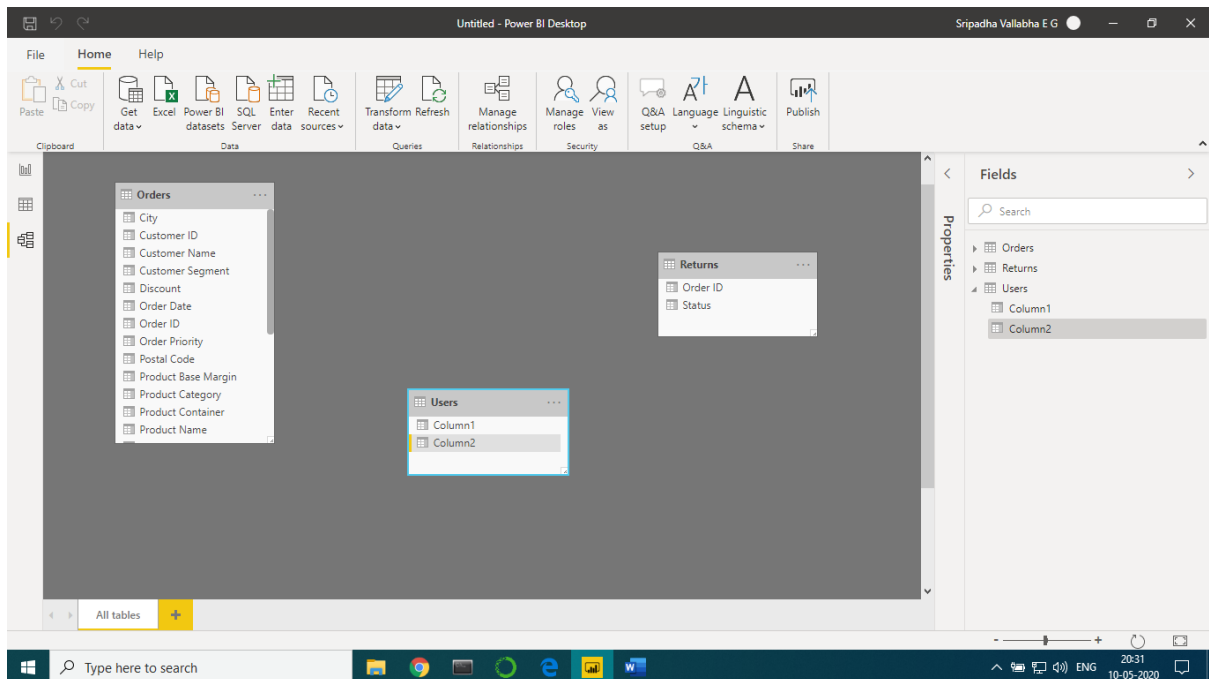

– Data View

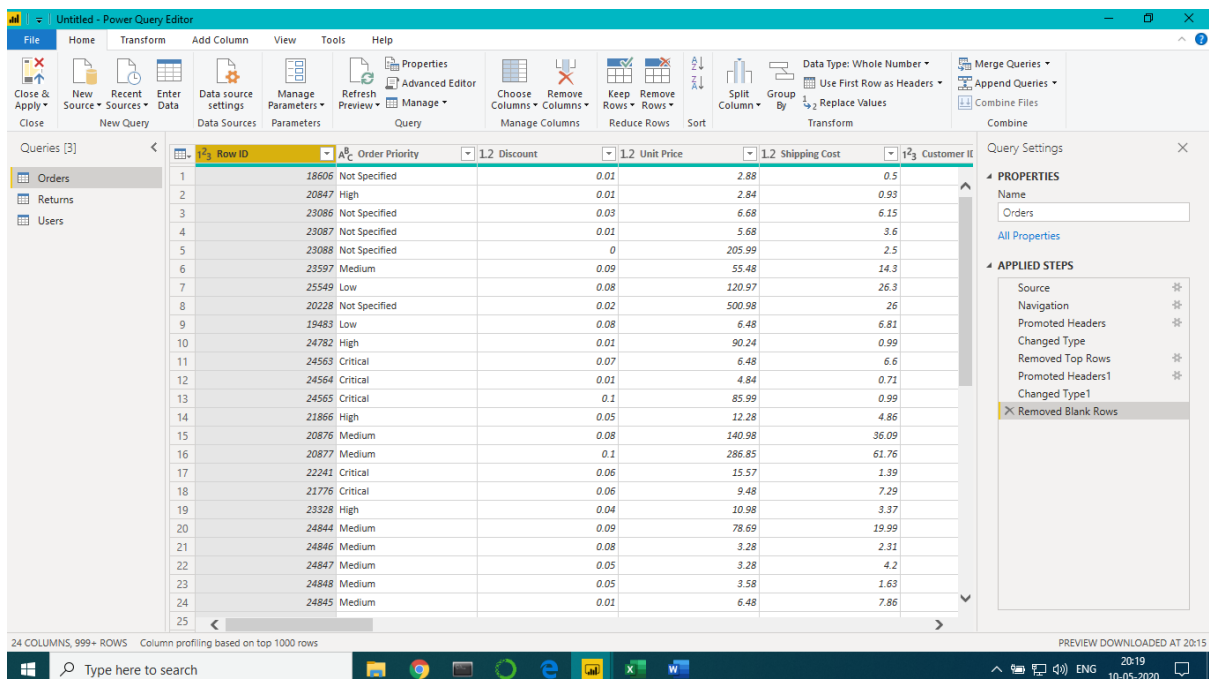

The screenshot shows the Power BI Desktop interface in Data View. The main canvas displays a table of orders. The table has columns for Row ID, Order Priority, Discount, Unit Price, Shipping Cost, Customer ID, Customer Name, Ship Mode, Customer Segment, Product Category, Product Sub-Category, and Product Name. The right-hand pane shows the 'Fields' pane with a list of data fields including Customer, Order, Product, and Sales.

Row ID	Order Priority	Discount	Unit Price	Shipping Cost	Customer ID	Customer Name	Ship Mode	Customer Segment	Product Category	Product Sub-Category	Product Name

– Model View

– Power Query Editor

– Advance Editor

- Prepare a document with details of the following along with their price

Power BI Desktop

Power BI Desktop is a free application you install on your local computer that lets you connect to, transform, and visualize your data. With Power BI Desktop, you can connect to multiple different sources of data, and combine them (often called modelling) into a data model. This data model lets you build visuals, and collections of visuals you can share as reports, with other people inside your organization. Most users who work on business intelligence projects use Power BI Desktop to create reports, and then use the Power BI service to share their reports with others.

Power BI has three pricing plans: Power BI Desktop: This offering is free to any single user and includes data cleaning and preparation, custom visualizations and the ability to publish to the Power BI service.

POWER BI PRO

Power BI Pro is an individual user license that lets users read and interact with reports and dashboards that others have published to the Power BI service. Users with this license type can share content and collaborate with other Power BI Pro users

Power BI Pro: The Pro plan costs \$9.99/user/month.

Power BI Premium:

You can use Power BI Premium to get dedicated and enhanced resources for your organization, so users in your organization can use the Power BI service with better performance and responsiveness. For example, with a Power BI Premium subscription, you and your organization's users get access to:

- Greater scale and performance
- Flexibility to license by capacity
- Unify self-service and enterprise BI
- Extend on-premises BI with Power BI Report Server
- Support for data residency by region (Multi-Geo)
- Share data with anyone without purchasing a per-user license

The Premium plan starts at \$4,995 a month per dedicated cloud compute and storage resource.
